

# Innovative Strategies for Mobile Workforce Management

Sofbang's Mobile Workforce Management app allows your organization to mobilize asset-centric or paper-intensive tasks, unifying processes and integrations across your backend systems. Users are able to:

- Streamline Work Order Management
- Optimize Inspections & Inventory Management
- Receive Real-Time Push Notifications

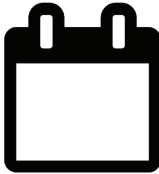

By leveraging such systems like E-Business Suite, Primavera, PeopleSoft and ERP, your applications can be integrated and extended to your remote workers.

MCS is focused not only on providing enterprise quality Mobile Backend as a Service (MBaaS), but also providing easy to use tools for business professionals to analyze and mine data about the usage of the MBaaS. Come join us!
